Flat or tapered in 2 1/2", 3 1/2", 4 1/2" and 5 1/2"
- D. TILT ROD**
Made to move easily
- E. DIVIDER RAIL**
Necessary when shutter is more than 72" high
- F. BOTTOM RAIL**
3" to 5.25" standard height

MEASURING INSTRUCTIONS

BASIC GUIDELINES

Before you begin measuring, choose whether the shutters will be an inside mount or outside mount. Inside mount shutters attach and hang inside the window frame. Outside mount shutters hang outside the window opening, either on the trim itself or beyond the trim. Outside mounting can make a window appear larger, or hide unattractive window trim. If the diagonal measurements on your window vary more than 1/4", we suggest using an outside mount.

INSIDE MOUNT

Inside mount for Z, LZ, L1 frames and hanging strips

First measure the width of the window opening in three places, order the smallest width.

Next, measure the height of the window opening in three places, order the smallest height.

OUTSIDE MOUNT

Inside mount for frames L1, L2, L3 and H frames

First measure the width from the intended outer edge of the shutter frame in three places, order the largest width.

Next, measure the height of the intended outer edge of the shutter frame in three places, order the largest height.

CUT-OUTS

Ultra View tilt option

Introducing Ultra View, an invisible gear system tilt rod control to adjust and control light without having the tilt rod. Cleaner look and exposure. Available on 3 1/2" and 4 1/2" louvers.

Colors

27 of most popular paint colors and 10 stain colors as our standard colors . Custom color match is available at \$100 surcharge per color.
